

# BLACKKING I

## LED GROW LIGHT CONTROLLER

This powerful LED Grow Light Controller features a 4.3" LED touch screen which gives the user full control over their lighting all at their fingertips. This unit can control up to (200) Grower's Authority LED grow lights simultaneously through an RJ45 or RJ12 cord. When using an RJ45 connection, the user can individually configure up to 4 channels to completely customize their setup.

This lighting controller is a must have for any setup and is an invaluable tool in a grower's toolbox.
