## NFT Hydroponics Leafy Greens System, 5 Shelf (BOX A)

### How does it work?

This nutrient film technique 5 adjustable shelf system will allow you to have an inside garden booming in no time. Each growing shelf height can be adjusted based on different plant requirements. There are 4 growing layers (18 pods each) and 1 seed starting layer (50 pods). The seed starting layer is located at the bottom of the unit.

The system has a main reservoir located at the bottom of the unit. It recirculates nutrient water from this reservoir to each of the growing shelves. The water flows through the shelves individually and exits through an overflow drain that returns to the main reservoir. The system recirculates it again.

This easy to use automatic hydroponic system features a touchscreen panel that controls all aspects of the growing unit including lighting, timers, and more.

This compact system is the equivalent of approximately 50 square feet of growing space. If placed inside, the plants will increase oxygen levels and assist with air filtration within the home. When the time comes to clean each shelf, our system has made this easy with removable shelving tops. Each shelf top easily pops out to allow for quick cleaning.

### What's included?

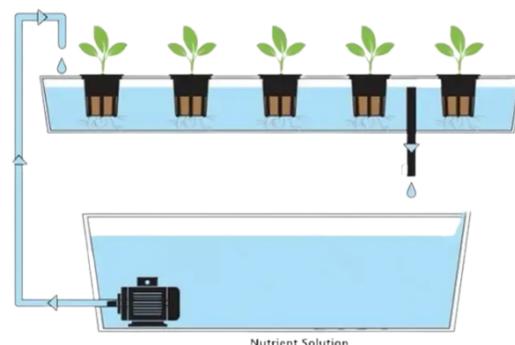

- |  |                                      |                                      |
|--|--------------------------------------|--------------------------------------|
| (1) Spray Bottle (Box B)               | (4) Planting Cover Layer (Box A)     | (1) Bottom Water Pipe Column (Box B) |
| (160) 1.5" Net Cups (Box B)            | (1) Seedling Tray Layer (Box A)      | (3) Water Pipe Column (Box B)        |
| (20) Net Cup Light Cover (Box B)       | (1) Seeding Cover Layer (Box A)      | (5) Threading Column (Box B)         |
| (1) Intelligent Control Layer (Box A)  | (1) Nutrient Reservoir Layer (Box B) | (4) Legs (Box B)                     |
| (3) Planting Layer Single Plug (Box A) | (10) Circular Column (Box B)         | (1) Layer Pipe (Box B)               |
| (1) Planting Layer Double Plug (Box A) | (1) Top Water Pipe Column (Box B)    | (2) Water Pipe Bending Card (Box B)  |

### Specifications

|                            |                       |                          |                     |
|----------------------------|-----------------------|--------------------------|---------------------|
| Number of Pods:            | 12 Pods               | Operating Temperature:   | -4° to 113°         |
| Growing Height:            | 7"-19.5" (adjustable) | Voltage Input:           | 110V/220V           |
| Complete Unit Dimensions:  | 15.5" x 7.2" x 21.5"  | LED Spectrum:            | Veg, Bloom, or Full |
| Complete Unit Weight:      | 3.1 lb                | LED Dimmable:            | Yes                 |
| Stand / Shelving Material: | Aluminum Alloy / ABS  | LED Light Watts:         | 24W                 |
| Timer:                     | Yes, 24 Hour          | LED Light $\mu$ mol/J:   | 2.0                 |
| Water Capacity:            | 1.0 Gallon            | LED Light Waterproofing: | IP44                |
| Water Capacity Level:      | Yes, Front-Facing     | Country of Origin:       | China               |
| Color:                     | White                 |                          |                     |

### Warranty

1 Year Manufacturer Warranty. The warranty covers all parts but does not include labor or repair costs.
